ABOUT THE SEMINAR

In the era of rapid technological advancements, the integration of digital learning has become a cornerstone of modern education. This one-day national seminar on "Digital Learning and the Role of Technology in Teacher Education" aims to explore the transformative impact of digital tools in shaping future educators. Experts, academicians, and practitioners will engage in insightful discussions on innovative pedagogies, emerging technologies, and best practices in digital education. The seminar will highlight how technology can empower teachers, enhance learning experiences, and bridge educational gaps. It will provide a platform for sharing research, experiences, and forward-thinking strategies for teacher training in the digital age. Join us in this enriching discourse to redefine the future of teacher education through technology-driven solutions.
